

SharkaTaq™

Includes dNTPs for Killer Value!

High Priced PCR Enzyme Suppliers are Afraid

Frontier
Genomics Inc.

Science for a Living Planet

PCR is a basic laboratory procedure that can really eat into your research budget.

Frontier Genomics SharkaTaq™ DNA Polymerase Kit features a robust and highly cost effective Taq polymerase that comes complete with dNTPs and buffers for assay optimization. The polymerase forms the basis of many of our reagent kits and can become a work horse in your lab too.

Priced at only \$150 for 500 rxns including buffers and dNTPs, PCR need not take a big bite out of your research funds.
